

SPAN[®]

Enhance your solar & backup experience

Adding solar or storage to your home? Get more out of your investment with a SPAN smart electrical panel.

Outlast every outage

When the power goes out, SPAN instantly prioritizes battery power where it's needed most, extending battery duration by 40% in an outage.

Power what matters

SPAN allows you to select what rooms and appliances receive power in an outage for the most flexible backup experience available.

Protect your power

SPAN monitors 100% of your home's energy use to automatically avoid unexpected battery drains, overloads, and brownouts before they happen.

Plus, when you install SPAN as part of your solar or storage project, **you pave the way for smarter, cost-effective home upgrades** for decades to come. SPAN automatically balances the electricity in your home, making it easy to add major appliances like EV chargers, heat pumps, and induction ranges whenever you need to. **Get total control over your home energy and avoid costly electrical utility upgrades down the road.**

Do it once, do it right with SPAN.

The solar & storage + SPAN advantage

Get 40% more battery, 100% control with SPAN

With SPAN

Without SPAN

Extended battery duration

Yes—SPAN provides 100% control and extends battery duration by 40% in an outage by instantly prioritizing battery power where it's needed most

No—Fixed battery life that can't be extended and no ability to prioritize battery power in real time

Flexible backup

Yes—Select what rooms and appliances receive power in an outage for the most flexible backup experience available

Limited—Most batteries can backup only 4-8 breakers/appliances. All backed up loads hardwired at time of install

Protected power

Yes—SPAN automatically avoids unexpected battery drains, overloads, and brownouts before they happen

Limited—Only with select battery partners and dependent on installation

100% visibility

Yes—SPAN learns how homeowners use energy and makes 'time remaining' estimates based on historical consumption data

No—Visibility into battery percentage only; no backup time remaining estimates available

Inflation Reduction Act

Depending on your project, you may also be eligible for tax credits* that can reduce the cost of your SPAN Panel installation. Visit [rewiringamerica.org](https://www.rewiringamerica.org) for details.

*SPAN may qualify for Inflation Reduction Act tax credits up to 30% off of product and installation. Please consult tax, legal, and accounting advisors before engaging in any transaction.
